# Idealcast Baths

The bath that thinks it's cast iron

## Idealcast

The strength of cast iron with half the weight

Idealcast is a composite of resins and minerals, which is cast onto the reverse of a vacuum formed acrylic shell. This creates a very rigid product, comparable with the solid feel most people associate with cast iron, surpassing British Standard requirements for baths. Each bath comes with our 25 year guarantee.

## Small spaces, big ideas

When space is tight, the challenge is on for bathroom designers to develop solutions that are both stylish and functional. Armitage Shanks creates bathrooms to suit everybody's needs – big or small. The compact Cameo baths measure just 1500mm in length, and are petite, yes, but still large enough to indulge in a good soak.

The Broadway offset corner bath is yet another creative space saver. Or why not try out our showertub, perfect for en-suite bathrooms where space is at a premium. All baths are designed and made to the highest standards. Armitage Shanks baths are moulded from a high quality acrylic sheet which is warm to the touch.
